

# William Heeb

Software Engineer

## SUMMARY

Innovative and detail-focused software engineer with a keen passion for AI. Demonstrated success in developing and deploying effective front and back-end web applications. I am eager to contribute my skills to a tech powerhouse with a global footprint. I Discovered my passion for coding over eight years ago while testing software builds, and since then, I've been dedicated to pursuing a career in software engineering.

## Lead Software Engineer for Anything\_AI

February 2024- present

- Deployed fully functional AI agents designed to be integrated into any app or webpage. Emphasizing heavily on security..
- Encompassing security with proper sanitization to minimize hallucinations while Providing customers with the most uptime by implementing effective system management strategies.
- Adhered to stringent safety protocols in a rapidly involved field.Maintaining top priority status for user protection and data integrity.
- Implemented one-click API integrations to facilitate all AI platforms. Ofusacting or simplifying the bearer token processes to streamline usage.
